

Firth High School  
**2010-2011 Gaming Club**  
Joe Rodriguez-Director

As part of the Professional Technical Program I am required to form student organizations that promote the PC/Networking class. Building, maintaining and networking computers serves many different purposes. Gaming is one of them. There are video, performance and PC settings unique to games and networking issues to consider.

This club will be using the PTE lab to experiment with games that are either free or games acquired for classroom use. There is no infringement on software licensing or installing of student games on school computers. Some examples are Halo, Guitar Hero, Zelda, Mario Brothers, Pac Man, etc. We will also be networking Xbox or PS2 systems together and deal with all of the connectivity/network issues required to communicate with each system.

I am requesting permission to allow your student(s) to participate in the gaming club. The software is free and most of it comes from online sites that are monitored. Your students will have constant supervision during game time. ONLY students who have permission slips signed will be allowed into the lab. We will be gaming in a closed lab during lunch time from approximately 12:45 to 1:10. I will make sure students are on time for their next class, as I have class 5<sup>th</sup> hour as well.

I will meet with your student(s) to go over the rules and establish some other times that we could get together. I will also have the lab open during the summer to give them something extra to do. If you want to insure your student does NOT participate in the club please email me at [gaming@d59.k12.id.us](mailto:gaming@d59.k12.id.us).

Regards,

Joe Rodriguez  
PTE Instructor
